-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application is in condition for allowance except for the presence of claims 12-15, 17-25, 36-37, 42-46 and 50-54 directed to an invention non-elected with traverse in the reply filed on 08/11/2005. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The claims recite a "storage element comprising a low-resistance filament". The disclosure does not teach the structure of the element "a low-resistance filament", except stating that data is written by using said low-resistance filament. Since a filament is defined as "a single thread or a thin flexible threadlike object", the claims were rejected based on said definition. The examiner previously agreed that prior art's

Art Unit: 2811

device does not teach separate and distinct material formed in the storage element, used for data writing operation.

However, in light of applicant's statement that "The differences between the cited prior art and the indicated claims are significant because the low-resistance filament provides an improved way of writing data into a storage element" and "Thus, the claimed subject matter provides features and advantages not known or available in the cited prior art", and together with the depiction of filament 110 in figure 3, it is understood that the low-resistance filament is a separate and distinct material/element, formed in the storage element, and used for data writing operation. Therefore, prior art do not teach or suggest, singularly or in combination, at least the claimed limitations of a storage element comprising a low-resistance filament disposed therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ori Nadav whose telephone number is 571-272-1660. The examiner can normally be reached between the hours of 7 AM to 4 PM (Eastern Standard Time) Monday through Friday.
